

BMC Helix Edge 24.x: Fundamentals Architecture and Components (WBT)

[Learning Path >](#)

Course Code: ASSR-HEFA-2420

Modality	Duration	Applicable Versions	Target Audience
Web-based Training (WBT)	45 minutes	BMC Helix Edge 24.2	<ul style="list-style-type: none">• Users• Administrators

Course Overview

BMC Helix Edge consolidates and funnels operational data, merging IT and OT data to monitor critical systems and predict failures. It addresses performance, downtime, customer service, and asset management challenges across BMC products. Operating at the edge, it automates issue resolution by collecting, processing, and analyzing data at the edge. Using machine learning, it detects anomalies, forecasts maintenance, and enhances operational efficiency.

This web-based training introduces students to the needs, essential features, applications, and advantages of the product. They will gain an understanding of its architecture and its relevance across various industries along with use cases.

Prerequisites

- NA

Recommended Trainings

- NA

Learning Objectives

- Identify the business challenges associated with IoT and edge computing technology
- Determine the necessity for BMC Helix Edge to address these challenges
- Provide an overview of BMC Helix Edge and its core functionalities
- List the benefits of using BMC Helix Edge
- Detail the features of BMC Helix Edge
- Explain the architecture of BMC Helix Edge and its components
- Identify the industries and use cases where BMC Helix Edge can be applied

Course Lessons

Lesson 1: Need for BMC Helix Edge

- Overview of IoT and Edge Computing technology
- Business Challenges in the context of IoT and edge computing technology
- Need for BMC Helix Edge
- Introduction to BMC Helix Edge

Lesson 2: Features and Architecture of BMC Helix Edge

- Benefits of BMC Helix Edge
- Features of BMC Helix Edge
- Architecture of BMC Helix Edge
- Applicable industries and use cases
- Product overview demo
